Name | Student ID | Role

1. Introduction (1 page)

Briefly introduce the problem domain.

Example:

"Urban university students struggle with managing multiple deadlines and tasks. Many students rely on manual planning methods, leading to stress and missed deadlines."

2. Problem Discovery (2-3 pages)

This is the most important section.

A. Empathy Map

Target segment example:

- University students balancing classes, part-time work, and activities.

Include:

- **Says, Thinks, Does, Feels**
- **At least 8–10 insights**

B. Customer Journey Map

Stages example:

1. Receiving assignment
2. Planning

3. Doing task
4. Submission
5. Post-submission reflection

Identify “pain points” and “opportunities”.

C. Interview Findings

- Interview **5–8 users**
- Present:
 - Key insights
 - Quotes
 - Themes

Example insights:

- “I forget deadlines because notifications are scattered across different apps.”
- “I want a simple dashboard to see everything at once.”

3. Solution Ideation (2 pages)

Present **several solution ideas**, not just one.

Example Ideas:

1. **Smart Calendar App** with AI reminders
2. **Gamified Task Manager** that gives reward points
3. **AI-driven Dashboard** that pulls deadlines from LMS automatically

Selection with justification:

Explain why your group chose the final solution (market fit, feasibility, uniqueness).

4. Value Proposition Canvas (1-2 pages)

Fill in **Customer Jobs**, **Pains**, **Gains** and match with **Pain Relievers** and **Gain Creators**.

Example:

- *Pain*: Forgetting deadlines
- *Pain Reliever*: Automated deadline extraction from LMS

5. Initial Business Model Canvas – Initial Draft (1–1.5 pages)

Include:

- Key partners
- Value propositions
- Channels
- Customer segments
- Revenue streams
- Cost structure
- Key activities
- Key resources

6. Conclusion (0.5 page)

Summarise the opportunity and business potential.
